Summary

Frontend Developer with 4+ years at Tier2 Digital, building WordPress and WooCommerce platforms plus full-stack products in React, Laravel and Node.js. Custom plugins, workflow automation, CRM and WhatsApp integrations, and AI tooling. Recent work cut a client's manual admin effort by up to 80%.

Experience

Tier2 Digital

Aug. 2022 – Present

Frontend Developer

WordPress, WooCommerce, PHP, React.js, Laravel, Node.js, MySQL

- Shipped 7 custom WooCommerce plugins for a medical e-learning client: edition management, FluentCRM segmentation and WhatsApp campaign triggers. Cut manual admin effort 70-80% and recurring site errors 80%.
- Build and maintain client WordPress and WooCommerce platforms end to end: custom themes and plugins, payment gateways, GST tax rules, CRM integrations and performance work. Take on full-stack builds (Laravel SaaS, React interfaces, Node.js tools) and turn Figma designs into pixel-perfect responsive UIs.

Freelance

2020 – 2022

Independent Web Developer

- Shipped client websites, landing pages, CMS workflows and interaction prototypes.

WordPress and WooCommerce Automation Suite

WordPress, WooCommerce, PHP, FluentCRM, AiSensy, Make, MySQL

- Built 7 custom plugins covering edition management, CRM segmentation, WhatsApp campaign triggers, dynamic checkout controls and a Sheets-powered spotlight carousel. Automated course setup, FluentCRM syncing and AiSensy messaging.
- Took the homepage performance score from 18 to 87 with a reusable optimizer plugin that handles DOM cleanup, minification and caching.

Design Subscription Platform

Laravel, React.js, Tailwind CSS, MySQL, WordPress, WooCommerce, Stripe, GSAP, Spline

- Built the full platform: a Laravel task portal with real-time designer collaboration, a WooCommerce onboarding pipeline and a GSAP-animated WordPress landing page with Spline 3D. Designed the React task UI and the Tailwind component system.
- A Stripe subscription on WordPress unlocks the Laravel platform automatically, with no manual steps after signup.

AI Editorial Tool inside Google Docs

Node.js, TypeScript, LangGraph, Google Gemini, Google Docs, Fastify, SQLite, Apps Script

- Apps Script add-on that picks up a Google Docs comment, runs it through an 8-node LangGraph pipeline (intent analysis, medical safety gate, retrieval, rewrite, three parallel validators, AI judge with auto-retry) and posts the result as a reply. Editors refine by replying in the same thread.

Frontend Auditor

2025

Agentic Website Auditing Tool

Node.js, React, Vite, Playwright, Lighthouse, SQLite, AI integration

- One URL, and an agentic crawler audits up to 50 pages with Lighthouse and Playwright: Core Web Vitals, SEO, security headers, broken links. Live logs, JSON/HTML reports. Hours of manual auditing down to minutes.
